

MUKONAZWOTHE MUDAU

Graduate Software Engineer | Junior Full-Stack / Backend Developer

Johannesburg, South Africa | +27 68 780 3088 | mukonazwothemudau90@gmail.com

[LinkedIn](#) | [GitHub](#) | Available January 2027

PROFESSIONAL SUMMARY

Final-year BSc Information Technology student at the University of Johannesburg, majoring in Application Development and Software Engineering. Building full-stack applications with Java, C#, .NET, JavaScript, Node.js, React, PostgreSQL and MySQL. Completed a Cisco Introduction to Cybersecurity credential and an Artificial Intelligence in the Fourth Industrial Revolution short learning programme. Seeking a graduate software engineer or junior backend / full-stack role starting January 2027, with a focus on secure, well-tested web services.

EDUCATION

Bachelor of Science in Information Technology (Computer Science and Informatics)

University of Johannesburg, Johannesburg, South Africa | January 2023 to December 2026 (expected)

- Completed 300 NQF credits (academic transcript dated 26 June 2026), including Computer Science 3A and Informatics 3A.
- Computer Science 1A/1B and Informatics 1A/1B passed with distinction.
- Relevant coursework: Software Engineering; Advanced Software Engineering; Object-Oriented Programming; Databases; Computer Networking; Operating Systems; Electronic Commerce; Calculus and Linear Algebra; Statistics.
- Award: Artificial Intelligence in the 4IR (Short Learning Programme).

PROJECTS

Student Accommodation Management System [Live demo](#)

TypeScript, React, Vite, Node.js, Express.js, Prisma, PostgreSQL, Supabase Auth, Zod, PayFast, Socket.IO, REST APIs

- Built a full-stack student housing platform for applications, room inventory by floor, allocations, leases, payments, maintenance and admin reporting.
- Implemented registration and login with JWT (Supabase Auth), bcrypt, rate limiting and Zod validation across student, administrator, maintenance and system administrator roles.
- Modelled the domain in Prisma/PostgreSQL (properties, rooms, applications, documents, leases, payments, maintenance, notifications and audit logs) and stored files in Supabase with signed URLs.
- Integrated PayFast checkout and ITN webhooks plus office-recorded EFT, card and cash payments, including refund records that reopen rent months.
- Added lease countersignature (Wi-Fi credentials only after both parties sign), live Socket.IO notifications, and an admin control to open or close application intake.

Shuttles and Tours Management System (school collaboration, in development)

React, Vite, Tailwind CSS, JavaScript, Node.js, Express.js, PostgreSQL, REST APIs, JWT, React Native (in progress)

- Designed and built a full-stack booking platform for tour packages and shuttle transfers, covering customers, admins, drivers and vehicles.
- Implemented registration, login, password reset, cookie-based sessions, protected routes and role-based access control.
- Delivered booking create, edit and cancel flows, pricing, booking references, status tracking and customer history.
- Built admin and driver operations: tour CRUD, shuttle assignment, vehicle management, dashboard metrics and trip start/completion.

Pothole Route Finder

Java, Java Swing, graph algorithms, image analysis

- Built a desktop application that converts aerial road images into a weighted graph and detects pothole-like damage from brightness, saturation and local texture.
- Implemented Dijkstra shortest-path routing to recommend safer routes between selected points.
- Wrote custom data structures (graph, hash map, array list, min heap) and image-similarity comparison.

TECHNICAL SKILLS

Languages: Java, C#, JavaScript, TypeScript, Python, SQL

Frameworks and libraries: .NET, ASP.NET Core, Node.js, Express.js, React, Prisma, Java Swing, Bootstrap, Tailwind CSS

Databases and storage: PostgreSQL, MySQL, Microsoft SQL Server, Supabase Storage

Practices: REST APIs, MVC, Agile / Scrum, test-driven development, unit testing (Jest, Jasmine), Git, GitHub, CI/CD basics, input validation (Zod)

Tools: Visual Studio, VS Code, Figma, draw.io, Vercel, PayFast

CERTIFICATIONS

- [Cisco Networking Academy: Introduction to Cybersecurity \(January 2026\)](#).

LANGUAGES

- English: proficient (C1/C2).
- Tshivenda: native.
